Who we are

TensCare is an Employee Owned, multi-award winning UK business offering the latest in drug-free electrotherapy solutions, renowned for outstanding product quality and excellent customer service. Recognised by the Queens Award for Enterprise, our mission is to help the world feel better naturally.

Our mission

We recognise that by helping each other and working together, we are greater than the sum of the parts. The TensCare team and the partners we work with are fortunate; by working in healthcare we get to contribute beyond ourselves, improving the quality of people's lives which in turn improves the quality of life of the people in their world. We can all make ripples that extend beyond ourselves to help others.

Our process

We credit our success with our ability to develop and maintain a cutting-edge product portfolio, which continues to meet and exceed the expectations of the end user. TensCare's Management and Quality Systems are ISO 13485 accredited. This ensures that the product we have produced meets EU consumer health and safety requirements and our products are registered with many World Health Regulatory Authorities and Government Ministries of Health around the World.

Revolutionising the Beauty Industry

It's a known fact that when you look good, you feel good. These days it's harder than ever to decide on a beauty routine, with millions of creams and serums, and a huge uptake in cosmetic surgery and enhancements, it can feel like you need hundreds of products and hundreds of pounds to have a good beauty routine. And then there's the risks; creams that cost a fortune and don't work, or even worse, cause a skin reaction. Surgery is painful, risky, and expensive and can also cause reactions. Where do you even start?!

TensCare beauty therapy devices provide an affordable, safe and pain free alternative to cosmetic surgery, all from the comfort of your own home. Clinically proven and easy to use, our beauty range harnesses a combination of powerful EMS, Microcurrent and Light Therapy technologies to provide unbeatable facial and body toning and contouring, acne treatment, breast lifting, reduction of wrinkles and cellulite, and accelerated cell renewal for glowing skin.

Our EMS and Microcurrent devices use electrode pads to deliver small electrical pulses into the skin, mimicking the body's own electrical currents. These pulses cause muscle contractions for rapid muscle toning and stimulate cell renewal and collagen production. Featuring easy to use preset programmes specifically designed for different body areas, such as the face, breasts, arms, abs, hips and calves, our devices provide the ultimate tailored treatment.

We offer a wide range of different sized and shaped electrode pads to suit all needs, treatment types and body areas, including hypoallergenic electrodes for those with sensitive skin. Our Uniwand provides concentrated, precision treatment to smaller areas such as around the eyes and the jawline to give full and completely controllable toning and skincare and results you have to see to believe.

Electrotherapy has been used in the beauty industry for years, but has previously only been available in salons and clinics and has been disguised under names such as "Skin Tightening Treatment" and "Wrinkle Reducing Facial". We developed our beauty therapy devices for use at home, harnessing all the best of electrotherapy combined with easy to use preset programmes to make professional beauty electrotherapy available to everyone. This means you can look good, feel good, and save money! No more travelling for appointments, no more multiple treatments costing hundreds of pounds each time, just a one off purchase of a device you can use over and over again for years.

By offering a pain free and affordable alternative to cosmetic treatments and enhancements, the TensCare Beauty Range is changing the way the world looks at beauty therapy, and turning cosmetic technology that was once only available to professionals into something that is safe, easy and accessible to all.

GLOmask

Advanced Skin Light Therapy

LED Face Mask

Glomask uses combination light therapy to give healthy and radiant skin. Scientifically proven and used in professional beauty salons, Glomask uses blue, red and near infrared (NIR) light to repair, protect and rejuvenate your skin.

The Glomask comes with a wireless, hand-held controller for easy mode selection. The mask features an adjustable headband and unique eye-pad and chin rest design, allowing the user to wear the mask comfortably whilst minimising skin contact. Unlike other face masks, Glomask's eye-pad design also restricts eye exposure to light whilst not obstructing vision.

OKO

EYE MASSAGER

Oko, the new Eye Massager from TensCare and the first device of our upcoming Sleep, Stress & Relaxation product range.

Oko is designed to provide relief from eyestrain, and can also help soothe headaches, reduce dark circles under the eyes, whilst also providing a relaxing affect to reduce anxiety, lower stress and assist falling to sleep.

The eye massager is great for use at home, and also makes for an essential travel accessory.

OVA

Therma Belt

Period pain reliever

The Ova Therma Belt is the latest TensCare product to help combat period pain.

The Ova Therma Belt provides soothing heat therapy and gentle massage modes to help you deal with the symptoms of period pain.

Designed to be worn around the waist, the device features three temperature settings to provide you maximum relief.

SOMNUS

Sleep Aid Device

A new tool to improve sleep

Somnus is a new Sleep Aid Device from TensCare. It uses Cranial electrotherapy stimulation (CES) to aid falling asleep, reduce waking during the night and improve overall sleep quality.

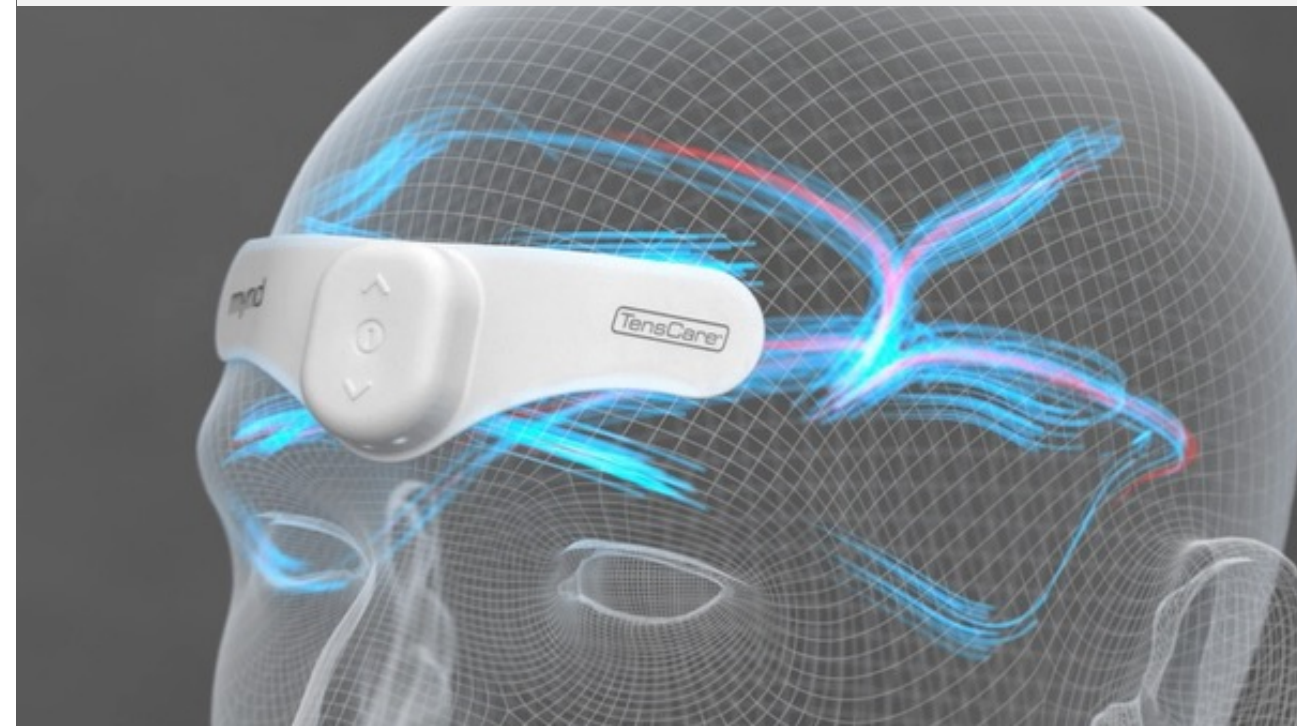

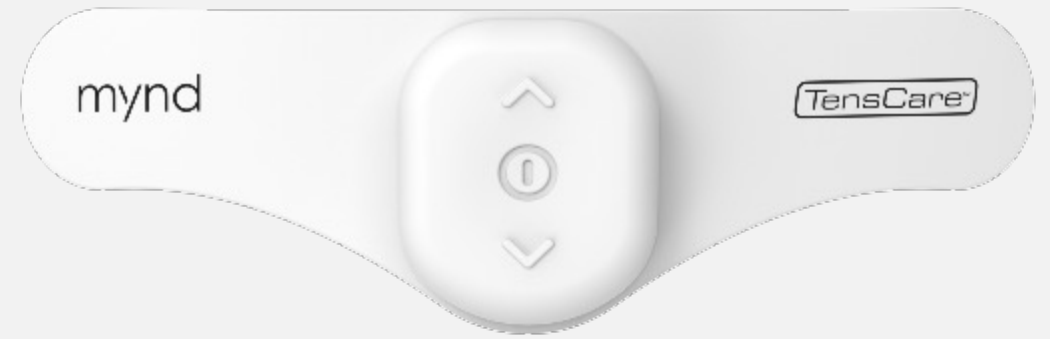

The device generates very small electrical pulses which stimulate the cranial nerves via wearable ear clip electrodes. This non-invasive neuromodulation technique has evidence in helping those who suffer from Insomnia, as well as anxiety and depression.

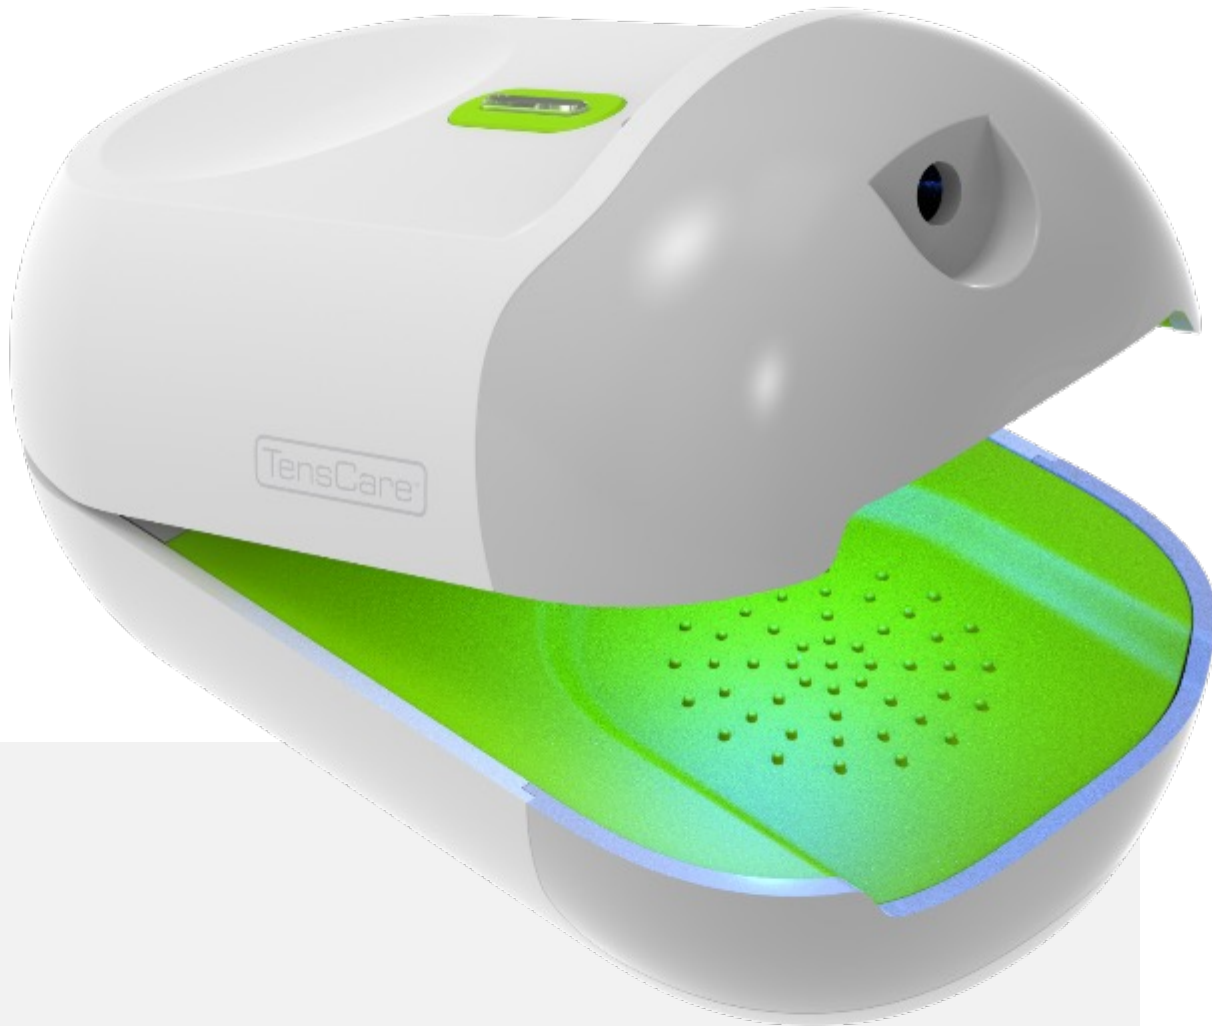

mynd

migraine relief

Mynd uses clinically-proven electrotherapy to help treat and prevent frequent episodic and chronic migraines.

This wearable device offers a soothing therapy with zero side-effects that can help you get back to your best. Mynd provides 40 adjustable levels of intensity, delivered through reusable gel pads. The device is slim, lightweight and rechargeable.

Nailit

Nail Cleaning Device

Nailit is a nail cleaning laser device designed to be used on fungal nails for the visible improvement in the appearance of the nails.

Nailit uses a combination of infrared and blue light radiation to penetrate the nail. The device delivers 7 minute treatment sessions, which are designed to be used daily.

The device features a dual-action hinge which allows it to be used effectively with fingers and toes.

Visible improvement is possible in just 3 months.

Uniglo + Uniwand

Face & Body Toning

Uniglo is a powered muscle stimulator is used for body toning and shaping, as well as for the reduction of wrinkles through a brand new, specifically developed Microcurrent programme. The device targets all areas of the body, including face, abs, buttocks and thighs, to help you keep your natural 'glo'.

Uniwand is a non-invasive facial toning tool to be used alongside Uniglo, to reduce visible signs of ageing.

Uniwand provides precise treatment of fine lines and wrinkles. By connecting Uniwand to the Uniglo device and using FACE 2 programme, microcurrent stimulation can be targeted on the facial areas that need the treatment.

perfectTENS

The Perfect TENS is specifically designed to provide safe and effective pain relief in the comfort of your own home. It can help manage the pain from a wide range of conditions.

Chronic pain: back pain, arthritis, rheumatic pain, lumbago, hip pain, osteoarthritic pain in the knee and sciatica central pain.

Musculoskeletal pain: fibromyalgia, falls, sprains, direct blows to muscles and auto accidents.

Acute pain: Dental and facial pain, neck pain, postoperative pain, migraine and neuralgias.
